**ecler**

# ABOUT US

Throughout all these years, since **ECLER's** birth back in 1965, we have always developed our **professional audio catalogue** trying to listen to you.

Today **ECLER** still keeps this aim untouched. We understand that these days rapidly changing technology must be a flexible tool to provide **global integrated audio solutions**, more than just individual products.

We keep focusing on **innovation and design**, both of which are essential. And we spot how they really add value: amazing features combined with a user-friendly and ergonomic **approach for the end-user**, the non-technical character of the story, but indeed the main one.

We realise that today **AV integration** has become a growing and solid market, frequently encouraging companies towards a global scope, with requests for global **audio partners**, like **ECLER**.

A global **green awareness** is, happily, growing as well. We are proud of being part of this vital commitment, **taking care of the planet** with products designed for **energy-saving** and **manufactured with sustainable policies**.

**ECLER** is ready to **offer you a quality sound solution for every audio installation** and integration challenge you may face. This has always been our goal, and we honestly think it has been achieved.

***Ecler. Innovating with you.***

# OUR VALUES

## EXPERIENCE

Reliability is a must. Every **ECLER** product is designed to deliver a long, solid and failure-free working life, even in extreme use conditions, thereby guaranteeing low MTBF (Mean Time Between Failures) ratios. We individually test 100% of our products, avoiding the typical random samples testing procedures in the industry. This leads us antirely TRUSTWORTHY manufacturing quality.

**ECLER** is an ISO 9001 certified company.

## INNOVATION

**ECLER** firmly believes that INNOVATION is essential in providing the market with pro-audio solutions that require a pioneer approach. SPM amplification patented technology and EclerNet proprietary hardware&software platform, including Ethernet remote control of the MIMO digital matrices, NXA digital audio managers and DUO-NET PLAYERS, are clear examples of our achievements.

## ERGONOMICS

Versatility. Our products have been designed to meet the technical and user requirements of a wide range of applications and environments. A good example is our WPmSCREEN digital remote controller for the EclerNet range of products: a touchscreen based device that can be tailored to graphically control and manage a whole installation, exactly meeting each end user profile and needs.

**ECLER** cares about control interfaces being as much user-friendly as possible.

## DESIGN

**ECLER** has been the first pro audio company to partner with the famous Italian industrial designer Giugiaro ([www.italdesign.it](http://www.italdesign.it)). The results of our collaboration are the loudspeaker cabinet series AUDEO and VERSO.

## GREEN

We are really committed with the planet's health, energy saving and CO<sub>2</sub> emission reduction. Energy Star certification, SPM Technology, class D amplifiers, switching power supplies and auto-standby function provide our electronics with higher efficiency and lower energy wasting. Recycling materials and using non-contaminant components are also top priorities in our green crusade.

## GLOBAL

Our philosophy is to provide our customers with a global solution. Firstly, this involves offering an extensive range of products under one single and solid roof. Secondly, to operate in more than 60 countries. People are one of our chief assets: a wide distribution network, relational marketing, product specialists, our own projects department, technical assistance service, training and cooperation... all with a view to better understanding what is required from our company and our SERVICE. Because global customers deserve a global solution. One supplier, a global partnership.

# OUR PHILOSOPHY

Ecler catalogue includes several product technology levels in order to offer installers and end users complete and efficient solutions, ranging from basic and budget-minded ones to sophisticated, ergonomic and integration-friendly ones.

We can clearly picture both ends of our catalogue with these two product categories:

- **ECLER ESSENTIALS**

A product range where we preserve the essence of ECLER in terms of reliability, quality and features at a very attractive price point. Each product reference that belongs to this range contains at the beginning the following “e” prefix = essential and its own series logo (in that way ESSENTIALS can be easily identified within ECLER product range).

- **ECLER DIGITAL**

Software-managed devices: premium digital products like matrices, amplifiers, audio managers, audio players, streaming receivers, control panels and Audio Over IP (DANTE) compatible devices that share our software management platforms (EclerNet and EclerCOMM), embed third-party integration and control protocols (TP-NET, CA-NET) and offer full customization to each project single requirement.

In between, still room for a wide offer of analogue audio products, including a premium level of features, audio quality and reliability.

Senses and emotions: while 83% of all commercial communication appeals only to one sense, our eyes, 75% of our day-to-day emotions are influenced by what we smell, and there is a 65% chance of a positive mood change when exposed to "positive" sounds. Senses and the emotions we feel as a result of what we sense have a very big impact on our purchasing behavior.

Music affects the consumer's behavior. The genre, loudness and tempo of music played have an effect on the consumer's length of stay, the value of their purchases, and the brands they choose in the establishment.

The sound quality also has a significant impact on a consumer's behavior. Distorted sound, a lack of clarity on vocals, or a poor low frequency response, can all lead to an unpleasant sensation that affects the way the consumer feels and then behaves.

Lastly, it must be said that each brand wants to be unique and to have a clear personality. Music content at POS is a key element in building this personality.

# HOSPITALITY/

The tempo of music has a direct impact on a consumer's behavior. The right background music creates a comfortable and relaxing environment in hotels, bars and restaurants.

If we talk about public address messaging, then intelligibility is the most important issue (e.g. emergency messages). This requires a level of sound quality and clarity too often missing in public address systems.

In other situations, like a seminar in a hotel, a professional audio system should cover a conference room with clear sound in every single area. Additionally, a well-designed and balanced system reduces vocal strain and fatigue, overcomes background noise easily and improves conference room management by increasing efficiency and acoustic comfort.

# EDUCATION/

Audio intelligibility is a key factor in the learning process. A professional audio system should help students to understand every word that is spoken. For this reason sound quality should be a priority in any classroom installation.

Music integrated into classroom routines and practice can enhance learning by heightening thinking, processing and memory skills.

Music is an enriching and valuable academic subject. A quality music education can improve self-esteem, behavior and social skills, as well as improve academic attainment in areas such as mathematics, literature and languages.

Music stimulates anticipation, builds atmosphere and helps establish a positive learning atmosphere. The rhythmic elements of music can facilitate and promote effective memorization, and the multisensory dimension of using music to layer other sensory triggers for learning helps energize the learning process. Many schools use music to sustain and focus children's concentration for extended periods of time.

# CORPORATE/

The role of audio in a corporate installation can be quite diverse. In most cases there will be background music in common areas to create a pleasant environment. There should also be the ability to address voice messages to employees. Furthermore it is most likely that there will be meeting rooms where we will try to have our minutes of glory presenting a brilliant proposal to a customer or to an internal audience using a multimedia format. Additionally there could be training rooms where we could educate employees or customers.

In all these cases sound quality and clarity are essential. There are some other key factors to take into account: the efficiency and user-friendliness for non-technical users, the ability to send digital audio content to different zones and/or the possibility to integrate audio with video, lighting or motorized screens under the same UCP (User Control Panel)

# SPORTS & WELLNESS/

Audio plays a very important role in sports & wellness venues. It can help you to relax in a yoga room, to dance in a salsa class, to keep rhythm in a spinning class - or it can be used to entertain with music at sports event or, even more important, address a relevant voice message to the audience (i.e. an emergency or evacuation message).

Therefore the audio system must be flexible enough to supply the right sound in each instance. There will be a need for sound sources with pitch control to modify the rhythm of the music, digital matrices and processors to send the audio contents to each one of the different destination zones, power amplifiers and loudspeakers to cover small and big distances and surfaces. But overall the key factor will be to achieve an audio quality that provides wellbeing when you want to relax, yet powerful enough when you are training or clear and intelligible when a message is addressed to you.

# HOUSE OF WORSHIP/

Typically, houses of worship are buildings without any kind of acoustic treatment on their interior surfaces. Most of them were built decades or centuries ago and at that time acoustics was not a major issue. Walls, ceilings and floors reflect the sound easily, creating reverberation and so poor intelligibility. If we want voice messages to reach the audience in a very clear and intelligible way, we will need to digitally process the audio signal in order to reduce low frequencies that mask mid and high ones, where human voice intelligible information is mainly found. Additionally we will have to use very directive loudspeakers that minimize acoustic reflections on surfaces (walls, ceiling, floor, furniture). Choosing the right equipment, the one that assures audio quality and intelligibility, will be a must.

# LEISURE/

There is a wide range of available leisure installations: museums, theme parks, theaters, cinemas, bars or clubs...

In a museum audio can play a role of as part of interactive multimedia presentation or as a public address system. Audio therefore must be able to be integrated with video or other multimedia devices. In a theme park it can entertain the visitors by playing music or direct voice messages to them. Audio will be placed outdoors in most of the cases and for this reason equipment must be designed to perform under different extreme weather conditions.

In a theater or cinema you want to understand the dialogue perfectly and, at the same time, you want to be transported to a different world for a couple of hours. In this case the music soundtrack and special effects will be often employing a multichannel immersive sound system. Good intelligibility and audio dynamics will always be key factors. In a bar music can create the perfect atmosphere to drink a beer and chat with friends without needing to shout to be heard. An excellent sound quality is a must if we don't want to create audio and vocal fatigue. In a club music is the key factor: it must make us dance. Without good sound there is no party. Reliability and a sound system with enough definition and punch, able to deliver all the power all the time, is essential.

ePLAYER1 is a compact audio player with a stereo output that can play music contents from local storage media (USB/SD card), Internet streams or digital sharing streams (DLNA and Airplay compatible). It includes Ethernet port, WiFi connection, USB and SD reader slots, front panel LCD display and local controls.

ePLAYER1

### KEY FEATURES

- Single-deck audio player
- Stereo output, RCA connectors and mini-jack
- Internet streaming receiver
- Digital sharing streams receiver (DLNA and Airplay)
- Local media player (from USB and SD card slots)
- Front panel LCD display and local controls
- **New modular firmware:** ePLAYER1 now has a new firmware with modular services that makes it possible for each user to personalize the way it works and adapt it to individual requirements for your project or business model. This new firmware includes, among other new functions and services, calendar events trigger, synchronization of contents hosted in the cloud (Cloud Disk Sync) and execution of "scripts" (files of instructions written by the user, Lua language – [www.lua.org](http://www.lua.org)).

## 3.1 DIGITAL MATRIXES

**DAM, MIMO** and **DANTE series** will let you process audio signals with outstanding flexibility, disregarding physical distance barriers when they are transported through Ethernet networks and providing custom-made, user-friendly control panels for the end users.

## 3.2 DIGITAL AUDIO MANAGERS

Digital Audio Managers can be understood and used as “all-in-one” audio devices.

Halfway between a digital matrix and a multichannel amplifier, including all their features and ready to fit as a global solution into projects that refuse isolated matrixes and amplifiers into the equipment list, in some cases due to budget reasons, in some others due to safety against manipulation and, in some others, due to installation easiness and maintenance costs... in many cases, being realistic, for all the previous reasons.

## 3.3 DIGITAL PROCESSORS

**ALMA** series includes 2 inputs by 4 outputs and 2 inputs by 6 outputs models: loudspeaker manager processors that will allow to take the best efficiency and sound quality from the set of loudspeakers and amplifiers in a venue.

Equalisation, crossover filtering, delay, compression and limiting... everything that is required to get excellent sound and system protection.

EclerCOMM software lets to adjust and program every parameter and store and export settings and presets to hardware units.

### APPLICATIONS

- Centralized, distributed or hybrid fixed installation
- BGM & Paging solutions
- Conferencing (automatic mixing)
- P.A. management
- Installations requiring remote total control
- Live sound (WiFi management is possible)
- Installations requiring remote supervision, diagnostic and adjustment via Internet

## MIMO CONFERENCE

## APPLICATIONS

- Conferencing & automatic mixing
- Centralized, distributed or hybrid fixed installation
- P.A. management
- Installations requiring remote total control
- Installations requiring remote supervision, diagnostic and adjustment via Internet

MIMO CONFERENCE has been especially designed for those applications that involve conferencing, microphone automatic mix processing and feedback loops (Larsen effect) cancellation. MIMO Conference shares the same hardware of the standard MIMO version, including a specific firmware upgrade with tailored DSP resources for automix and conference purposes.

## KEY FEATURES

- 8x8 configuration: up to 4 independent output mixes & 4 auxiliary outputs (MIMO88, MIMO88SG)
- 12x12 configuration: up to 4 independent output mixes & 8 auxiliary outputs (MIMO1212SG)
- 16x16 configuration: up to 8 independent output mixes & 8 auxiliary outputs (MIMO88)
- UCP (User Control Panels) remote control system, compatible with WPmSCREEN and third-party devices, such as computers, tablets, smartphones, etc.
- TP-NET protocol compatible, for third-party control systems integration
- Two microphone managing modes:
  - NOMA ("Number of Open Microphones Attenuated")
  - EXCLUSIVE
- Full set of working parameters: MAX. NOMA, LAST ON, PRIORITY, THRESHOLD DEPTH, etc.
- 2 automatic notch filter banks
- 8 notch filters included in each bank
- Fixed / dynamic filters free configuration
- Filter WIDTH, RECYCLE TIMER, LOCK, RESET and BYPASS parameters
- 4 working mode presets

### APPLICATIONS

- Audio Over IP transmission, using standard Ethernet networks
- Integration in EclerNet audio installations
- Analogue audio devices conversion into DANTE Digital Audio transmission
- Installations requiring remote total control
- Installations requiring remote supervision, diagnostic and adjustment via Internet

DN44BOB is a 4 inputs and 4 outputs DANTE (Audio Over IP) Break Out Box. It allows to convert 4 analogue audio signals into 4 DANTE channels and send them into an Ethernet LAN, as well as to take 4 DANTE channels from the Ethernet network and convert them to analogue audio signals. It includes 4 GPI control ports (0-10VDC) and 4 GPO control ports (NO/NC relays). Can be used together with EclerNet DANTE ready products or as a stand-alone DANTE interface, together with any audio device including analogue audio inputs and/or outputs.

### APPLICATIONS

- Solutions for background music and notices with message priority and selection of source/independent volume.
- Public address system for corporate spaces, catering, leisure centres, outlets, public buildings, etc.

eMIMO1616 is a digital audio matrix with 16 input and 16 output analogue channels. The input channels are: 4 channels for MIC/MONO LINE, 4 channels for ST LINE and 8 channels for MONO LINE received on the unit's REMOTE ports, from wall panels Emcontrol1. The 16 output channels can be set up individually (MONO zones) or in pairs (STEREO zones). 8 REMOTE ports for connecting monitoring wall panels + sending audio from the zones. 2 ports for connecting pager consoles. 2 audio signal priority levels (talkover/pager). Programming by integrated web server and standard web navigator, without the need to install additional software. Remote control for the user with the eMIMO pilot application, available for Android and iOS devices.

eMIMO1616

### KEY FEATURES

- 16x16 digital matrix
- Programming and control by integrated web server and standard web navigator (no additional software required).
- Control from the front panel and user remote control by:
  - eMCONTROL1 wall panels (up to 8)
  - eMPAGE warning consoles (up to 2)
  - pilot eMIMO application, compatible with Android and iOS: control graphic panels set to user requirements
  - TP-NET protocol for control and integrating with third party systems
- Control available, by zone (output): selection of audio source (input), volumen adjustment and MUTE, 3 band tone adjustment
- Input distribution, by type:
  - 4 x ST LINE
  - 4 x MICRO / MONO LINE with priority function that can be activated
  - 8 x MONO LINEA available in REMOTE ports, from wall panels and eMCONTROL1
- Priority function with two levels: inputs 5 to 8 MIC/LINE can attenuate (or completely mute) the sound content present (program audio) in specific target zones (emergency messages, warnings, etc.), in Talkover or Pager mode
- MUTE port can be activated by closing the external dry contact, affecting programmed outputs to this effect

	eMIMO1616
Inputs	4 MIC/LINE + 4 ST LINE + 8 Mono LINE
Outputs	16 Bal. (Euroblock)
Communication Interfaces	1 Ethernet + 1 RS232

Dimensions / Weight	HxWxD: 88 (2RU)x482,6x200mm / 3,7 kg.

eMIMO pilot is an end-user remote control application to manage one or several installation zones. Each end-user grants a customised access via his/her credentials, getting access to a closed list of control panels which have been previously decided by the eMIMO1616 Administrator. The Administrator configures and manages everything in the eMIMO1616 using its integrated webserver and a standard web browser from a computer or mobile device, and without the need of additional software installation. Each control panel can include volume & mute controls and/or audio sources selection keys and/or 3-band tone controls.

eMIMO pilot app is available for Android and iOS devices.

DAM614 is a fully programmable audio digital mixer. It includes 6 audio inputs and 4 audio outputs, front panel inputs and outputs level controls, DSP processing, RS-232 connectivity and 4 REMOTE control ports (0-10VDC). Its 4 outputs can be used as mono independent zones or coupled as stereo zones. Regarding inputs, the first 2 are stereo LINE inputs, and the 3rd, 4th, 5th and 6th ones are MIC/LINE ready, being possible to use them independently (mono) or as stereo-coupled inputs.

- Class D amplifiers (eco friendly)
- Auto stand-by function (eco friendly)
- 100% silent (fanless convection cooling system)
- Health self-test mode function, with FAULT RELAY (for an external redundancy system)
- Integrated anti-clip system
- Integrated DSP processor. Main features:
  - Inputs mixer independent per channel (all inputs available)
  - VOLUME, MUTE, SOLO, PHASE INVERSION, MAX. VOL limit and MIN. VOL limit, LP and HP Crossover filters, parametric EQ filters bank, Ducker, Delay, Compressor and more settings configurable per channel.
- Ethernet interface, compatible with EclerNet Manager platform and UCP remote control system
- TP-NET third-party remote control (compatible with CRESTRON®, AMX®, RTI®, VITY®, etc.)

# ALMA24 / ALMAcard / ALMA26

## APPLICATIONS

- Permanent installation management system
- Live sound. Monitor management
- Stereo bi-amped general applications

ALMA24 and ALMAcard are digital loudspeaker managers including 2 audio inputs and 4 audio outputs, USB interface and 2 volume remote control ports (0-10VDC). ALMA24 is a 1RU stand-alone processor, meanwhile ALMAcard is its card plug-in interface version, compatible with the DPA amplifier series (it is inserted into its rear panel interface card bay).

ALMA26 is a digital loudspeaker manager including 2 audio inputs and 6 audio outputs, USB interface and 2 volume remote control ports (0-10VDC).

## 4.1 LOW IMPEDANCE

Stereo and multichannel amplifiers ready to feed low impedance (standard) loudspeaker loads.

From ESSENTIALS models to high-end ones, an option for every budget and project profile.

## 4.2 HIGH IMPEDANCE

Fixed installations usually require a huge amount of loudspeakers fed by the same amplification channel and, in some cases, long wire runs must as well be used. Under these circumstances, high impedance technology is probably the best option.

Ecler high impedance range of amplifiers offers several options and levels in terms of technology, format and cost.

## 4.3 MIXING AMPLIFIERS

A range of self-powered mixers that can become the perfect single-box solution in most projects involving background music, microphone signals, paging, pre-recorded messages and evacuation alarms.

## 4.4 COMPACT AMPLIFIERS

**eCA** basic (**ESSENTIALS**) micro-amplifiers and **CA (premium)** micro-amplifiers, the last ones featuring amazing remote control features: serial RS-232 port, IR receiver and 0-10 VDC remote port.

They're an ideal solution in those audiovisual applications which require integration with external control devices: education classrooms, meeting rooms, multimedia presentations, retail shops, etc.

## APPLICATIONS

- Single or multi-zone BGM and paging systems with 100V line speakers, combined with the DAM, MIMO and SAM / eSAM series preamplifiers / processors

HSA300 is a single channel amplifier with direct 100 V line (high impedance) output. It's equipped with ECLER's proprietary SPM 100 Technology - Channel N, which allows for 100 V speaker lines connection without using 100 V line transformers.

HSA2-400/HSA2-400ES is a stereo amplifier with low and high impedance powered outputs. A very high efficiency and its auto stand-by function provide this amplifier with a true green profile (HSA2-400ES Energy Star certified). Supports low impedance loudspeaker loads down to 2,66  $\Omega$ .

## APPLICATIONS

- Multi-zone BGM and paging systems with 100V line speakers, combined with the DAM614, MIMO88 matrixes and SAM / eSAM series preamplifiers

HZA4-70F/HZA4-120F is a four MERGING channel amplifier with direct 100 V line (high impedance) outputs. It integrates ECLER's proprietary SPM 100 Technology - Channel N, which allows for 100 V speaker lines connection without using 100 V line transformers at the amplified outputs, as this kind of amplifiers usually do. This fact has many advantages, being the main ones the audio quality improvement (specially in the low-end frequencies) and the convection cooling, 100% silent.

HMA120 is a self-powered mixer including an integrated media player and 5 external audio inputs: 3 x LINE ST, 1 MIC/LINE and 1 MIC. It features a 120W powered output that supports both low (4 Ω) and high impedance (70V, 100V) loudspeaker lines. It also includes a 2 level priority system (paging, emergencies, etc.), auto stand-by mode, AUX OUT and an additional remote control port to manage the source selection and output volume by means of WPM series wall panels. HMA120 is the perfect integral solution for user-friendly and budget audio projects.

HMA180 is a self-powered installation Public Address mixer. It features a total of 9 audio inputs and a high / low impedance amplified output, together with an extensive set of control connections and features to be the perfect single-box solution in most projects involving background music, microphone signals, paging, pre-recorded messages and evacuation alarms.

HMA180

### KEY FEATURES

#### HMA120:

- 2 balanced microphone input mixable with the selected music program (MIC1 and MIC2/LINE ST inputs)
- 3 line inputs for music sources
- Integrated audio player (supporting mp3 format) with USB and SD CARD slots for media storage devices
- Music program selector on the front panel: LINE1, LINE2, LINE3, MEDIA (integrated player)
- Noise gate and two-level priority system (Talkover 1 and Talkover 2) for MIC1 and MIC2/LINE inputs
- Independent level controls on the front panel for MIC1, MIC2/LINE and MUSIC signals
- 2-band EQ (BASS/TREBLE) for MIC1 and MIC2/LINE and 2-band EQ for program MUSIC signal
- REMOTE port for connecting WPM series wall panels, 0 - 10VDC (source selection and volume)
- MUTE port to remotely mute the unit from an external device, via dry contact closure
- Auxiliary Output
- Auto Stand-by function

#### HMA180:

- 4 MIC balanced and 4 LINE inputs
- Independent 3 band EQ for the MIC mix and LINE mix busses
- Pager & chime function, MIC1 input (voice level or contact closure activation)
- Additional EMERGENCY MIC/LINE input with independent features:
- Class D 180 W amplifier, convection cooled (100% silent)
- Remote Volume control port (0 – 10 VDC)
- Remote MUTE control port
- 24 VDC control output, triggered by the PAGER and/or EMERGENCY functions (to activate priority relays)
- Subsonic filter (@ 70 Hz)
- Insertion point in TRS format
- 8Ω , 70 V, 100 V powered output
- LINE level AUX output (allows for an external amplifier connection, like the HSA300 or HZA-F amps, in case that higher power is required)

## APPLICATIONS

- Audio Over IP transmission, using standard Ethernet networks
- Dante™ digital audio receiver
- Priority messages management
- Education, Retail Centers, Museums, Etc.

eCA120DN is a 2 x 60 WRMS @ 4Ω high efficiency (class D) stereo compact amplifier. It features 2 x analogue audio inputs and 2 x Dante™ audio inputs, both with selectable priority function (over the other input signal) as well as an auxiliary audio output. Auto stand-by function (selectable) and fanless design (100% silent). It also has a remote control volume port compatible with ECLER WPa wall-panel control series. Universal external power supply included.

eCA120HZDN is a 120 WRMS @ 100V efficiency (class D) mono compact amplifier for high impedance lines, with the same features than eCA120DN.

## 5.1 IN-CEILING

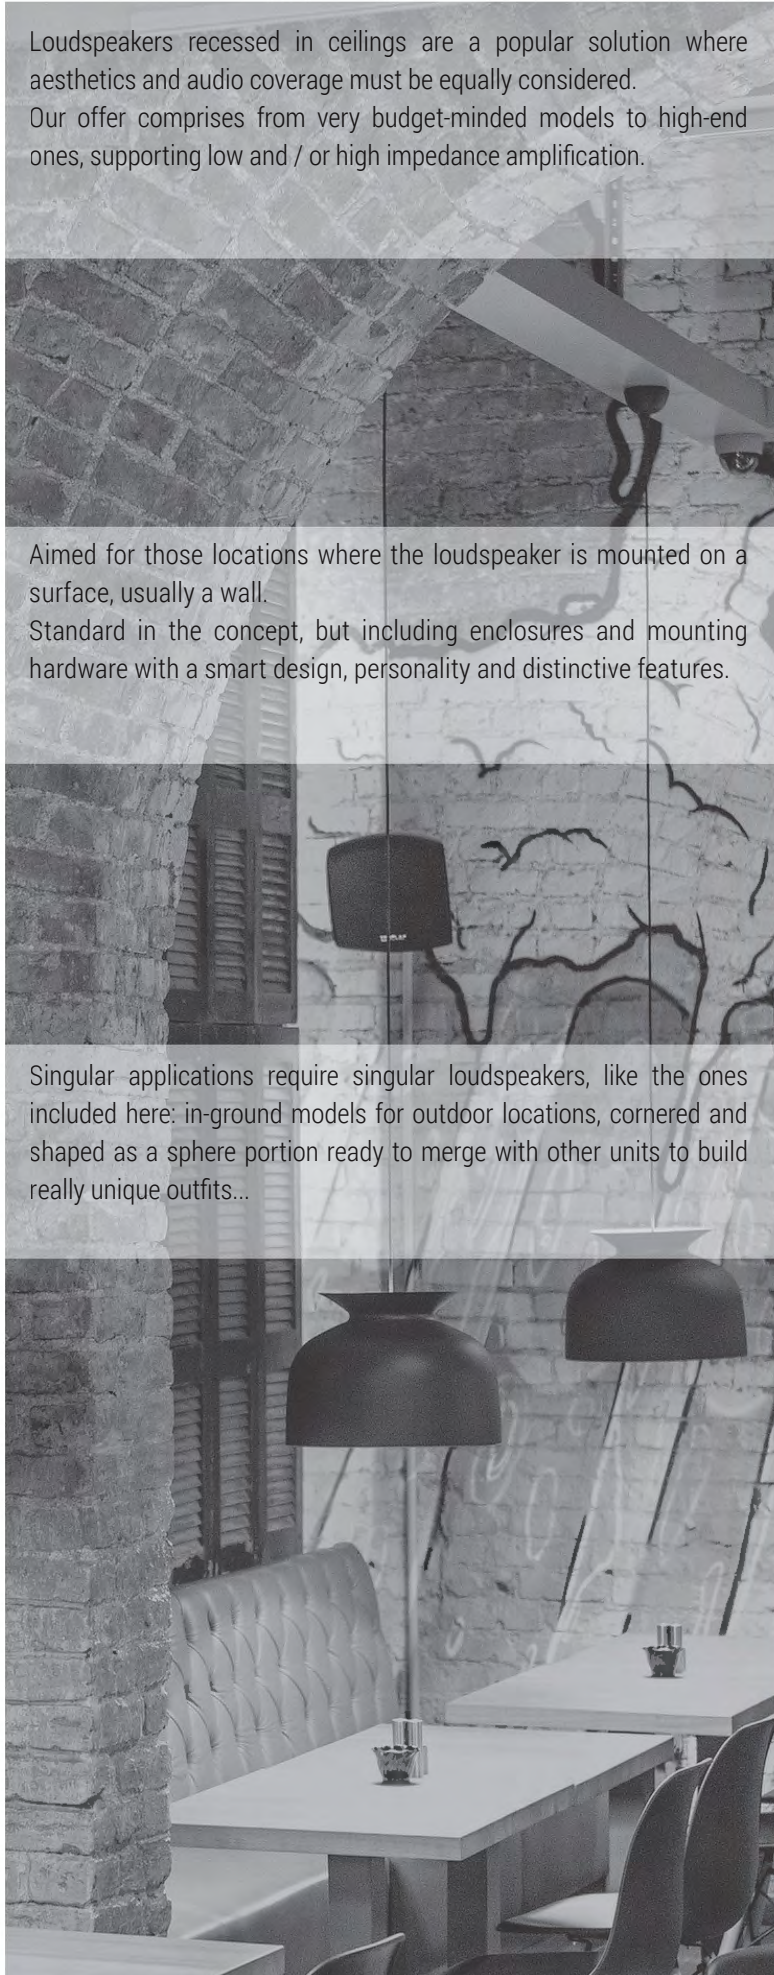

Loudspeakers recessed in ceilings are a popular solution where aesthetics and audio coverage must be equally considered. Our offer comprises from very budget-minded models to high-end ones, supporting low and / or high impedance amplification.

## 5.2 CABINETS

Aimed for those locations where the loudspeaker is mounted on a surface, usually a wall. Standard in the concept, but including enclosures and mounting hardware with a smart design, personality and distinctive features.

## 5.3 SPECIALIZED

Singular applications require singular loudspeakers, like the ones included here: in-ground models for outdoor locations, cornered and shaped as a sphere portion ready to merge with other units to build really unique outfits...

Paging Stations

## APPLICATIONS

- Paging, voice messages and speech

eMPAGE is a digital paging station (MPAGE16's evolution), compatible with eMIMO1616, MIMO88, MIMO88SG and MIMO1212SG digital matrixes. Includes: a gooseneck cardioid microphone (removable); 16 zone-selection keys; ALL, CLEAR and PAGE keys; 2 programmable keys, F1 & F2, for zone-group selection. Text labelling for destination areas by means of programmable electronic ink display.

MPAGE1r is a 1-zone desktop paging station, compatible with any device including a phantom-powered microphone input (SAM series, COMPACT series, DAM614, MIMO88, CA series, HMA series, etc.).

MPAGE4 is a 4-zone desktop paging station compatible with DAM614, CA series, etc. It allows for real-time paging with zones' destination selection.

MPAGE16 is a digital paging station compatible with the MIMO / MIMOSG matrixes. It features 21 touch-sensitive keys that, together with the MIMO hardware, allow for an easy, flexible and user-friendly configuration of a paging system that can coexist with other MIMO functions and with other control hardware and/or software control systems, like the WPmSCREEN, WPTOUCH or TP-NET.

# WPmSCREEN / WPTOUCH

## APPLICATIONS

### WPmSCREEN:

Remote control for installations including EclerNet devices:

- Direct control of MIMO / MIMOSG, NXA, DUO-NET PLAYER, etc, point to point (direct CAT5 cable, no network involved)
- Network control of a full EclerNet installation, including several MIMOs, NXA, DUO-NET PLAYER, and/or other EclerNet devices
- Integration in installation global control systems

### WPTOUCH:

- Remote control, managing source selection / preset selection, volume control and MUTE or other programmable functions (depending on attached devices)

WPmSCREEN is a remote control panel compatible with all the EclerNet products, like MIMO / MIMOSG, NXA series y DUO-NET PLAYER. It features a 7" touch-screen and an integrated UCP (User Control Panel) client and server hardware: no computer is required to run an EclerNet project and become a UCP webserver, once one or more WPmSCREEN units are installed in it.

Each unit can be configured by means of the UCP control system as a local zone control or as a global control, as they are totally compatible with the standard UCP panels architecture, and also with third-party UCP clients (iOS®, Android®, Windows®, etc.).

WPmSCREEN includes a surface mount installation box, and is as well compatible with standard recessed boxes and the VESA75 mount system.

WPTOUCH is a digital remote control for MIMO88 and MIMOSG matrixes.

Dimensions / Weight	HxWxD: 159x216x36mm / 550 g.	HxWxD: 86x86x56mm / 65 g.

### APPLICATIONS

- Remote control, managing source selection / preset selection, volume control and MUTE or other programmable functions (depending on attached devices)

eMCONTROL1 is a digital control panel for the eMIM01616 matrix with a wall format. It makes it possible to act as a zone control, enabling the user to have all or some of these 3 functions (programmable by the installer): volumen adjustment/mUTEm, selection of musical sources and EQ adjustment with 3 band tone control (BAS-MID-TREBLE). It also makes it possible, as an option, to be coupled to a WPa type panel with an audio connector: the pair behaves like a single panel providing remote control + direct sending to the eMIM01616 from a balanced audio signal. To do so, it uses a single CAT5 type cable or higher. With exceptions, this does not require its own power supply: remote power supply from a REMOTE port on the eMIM01616.

### KEY FEATURES

- Digital control panel compatible with the eMIM01616
- Volume adjustment, selection of sources and (programmable) EQ.
- Compatible with WPa series panels with audio connector, for sending audio and control signals via a single CAT5 cable or higher
- Aesthetics designed in collaboration with Italdesign Giugiaro

# WPa Series

## APPLICATIONS

- Remote volume control
- Remote volume control and/or source selection
- Remote 70/100V line attenuation
- Remote audio sources connection
- Mixing 2 inputs into a single balanced mono LINE output

## ACCESSORIES

■ WPa2SMBOX

■ WPa2FMBOX

WPa is a series of remote control wall panels for systems and interconnecting audio signals. It marks a development of its predecessor, the WPa series, with a modern, elegant, discrete aesthetic, designed in collaboration with Italdesign Giugiaro. WPa series includes surface-mount installation box.

WPaVOL is a remote wall panel control for one volume management. Compatible with all 0-10V DC REMOTE control port.

WPaVOL-J has the same features as WPa VOL + front panel stereo mini-jack connector.

WPaVOL-SR is a remote wall panel control for one volume management + source or preset selection. Compatible with all 0-10V DC REMOTE control port.

WPaVOL-SR-J has the same features as WPaVOL-SR + front panel stereo mini-jack connector.

WPaH-AT6 is a 70 / 100V line attenuator with integrated 24 VDC priority relay. 6W maximum output power.

WPaH-AT100 is a 70 / 100V line attenuator with integrated 24 VDC priority relay. 100W maximum output power.

WPaH-SL4 is a 70 / 100V V line selector (one out of 4 music program lines).

WPaMIX-T is a 2 channel micro-mixer which keeps the standard wall-panel format of the WPa series. It allows to mix a stereo unbalanced signal (2 x RCA) with a microphone signal (XLR), getting a balanced mono output that can be sent to a preamplifier, amplifier, mixer, digital or analogue matrix, etc., thus saving inputs in the receiver device.

The MIC input includes a 2 band EQ (BASS, TREBLE) and it can use the talk-over function to override the line signal when the microphone exceeds the talk-over detection threshold.

WPaCNX-CBO connection Wall Plate with Female 3 pin XLR connector + Jackk ST (combo connector). Screw-type connector at the back (no solder needed).

WPaCNX-JRCA is a connection Wall Plate with 1 x stereo minijack and 2 x RCA connectors.

ePINBLU is a portable BT wireless audio receiver with mini-jack connection. It includes USB charging cable, mini-jack to mini-jack connector, mini-jack to RCA stereo cable and quick guide.

WPPSU is an external, universal AC/DC converter for the DC supply of remote panels and devices. Compatible with all the WPa series panels requiring external DC power supply (except WPmSCREEN).

REVO-IR is an IR remote control including UP, DOWN and MUTE keys, for the volume and MUTE control of compatible devices, like WPTOUCH and CA series.

TR2-70 is a transformers kit including 2 transformers for the CA200z's amplified outputs' conversion: 4 Ω to 100V or 70V (high impedance).  
TR2-70 Kit is compatible with the optional 2UHRMKIT "in-rack" mounting accessory.

2UHRMKIT is a kit that enables a half-width and 2U height rack device to be mounted into a standard width rack cabinet.

1UHRMKIT is a kit that enables a half-width and 1U height rack device (ePLAYER1, etc.) to be mounted into a standard width rack cabinet.

WPmPSCRMKIT is a kit that enables one WPmSCREEN unit to be mounted into a standard width rack cabinet taking 4 RU.

PUM3 is a rack-mount accessory that allows to mount two half-width RU devices in 1 standard width RU space. Mounting screws included.

CNXE BEB1/2M5 is a 1m/2,5m length Euroblock bal.- Euroblock bal. cable.

CNXE BRCA1 is a 1m length 2xEuroblock bal. - 2xRCA Male/female.

CNXXLRFEB is a 0,5m length XLR female bal. - Euroblock bal.

CNXRCAEBAD is a RCA - Euroblock bal. adapter.

CNXE BLINK4 is a 4 Euroblock link cable,12cm between connectors. It allows to link inputs channels on multichannel amplifiers such as eGPA series.

CNXAC8RM is a 19" 8 x sockets power strip with ON/OFF switch.

USB232AD is a USB to RS-232 interface

MBSTAND is a microphone stand with boom arm.

MDSTAND is a desktop microphone stand.

WPa2FMBOX is a double Flush-Mount box, compatible with the WPa wall panel series. It includes a single frame for fitting 2 adjacent panels in a twin housing.

WPa2SMBOX is a double Surface-mount box, compatible with the WPa wall panel series. It includes a single frame for fitting 2 adjacent panels in a twin housing.

WPmSCRFMBOX is flush mount box for WPmSCREEN.

MP106NEST3 is a 3 NEST106 units corner mount bracket.

MP106NEST4 is a ceiling bracket for half sphere configurations (4 NEST106 units).

The PKIC series is a simple solution for giving colour and homogeneity to ceiling loudspeakers in the IC or IC6CLASS series. These easy to install accessories make it possible to combine different loudspeaker models in the same ceiling or wall, offering a homogenous, elegant, colourful finish. You can paint them yourself or we can do it for you!

**PKIC6:** this is an accessory for personalizing the IC6 ceiling loudspeaker. The kit includes a grille that can be painted (with the appearance of the IC6CLASS) and an accessory (anchor ring) to mount this grille on the IC6. Easy to paint and mount.

**PKIC8:** this is an accessory to personalize the IC8 ceiling loudspeaker. The kit includes a grille that can be painted (with the appearance of the IC6CLASS) and an accessory (anchor ring) to mount this grille on the IC8.

**PKICSB10** is an accessory to personalize the ICSB10 ceiling loudspeaker. The kit includes a grille that can be painted and an accessory (magnets) to mount this grille on the ICSB10.

Our painting service offers the possibility to paint any accessory in the PKIC series and the IC6CLASS grille, with a minimum of loudspeakers and with delivery within 15 days.

**COLORPAINT:** launching of painting loudspeakers in a colour (RAL). There is no minimum number of loudspeakers. There is no charge for launching when painting a minimum of 100 units in the same RAL colour.

**PAINT1S:** painting by unit when there are less than 10 units.

**PAINT10S:** painting by unit when there are less than 10 units and with a maximum of 99 units.

**PAINT100S:** painting by unit when there are 100 or more units.

# The Green Facts

Environmentally Sustainable AV

## ENERGY CONSERVATION

■ Ecler maximises energy conservation by utilising **SPM Technology** (patented by ECLER) in our amplifiers. Switching Power Mosfet technology is more efficient (73%) than bipolar transistors and conventional mosfets. The benefit of SPM technology is that most of the consumed power is converted into real audio power and less energy is wasted (via heat & processing)

## HIGHER EFFICIENCY

- Ecler ensures **higher efficiency** (more than 90%), **lower weight** (30% average) and **smaller heatsinks** (6 times smaller) by using **class D** amplification technology (Pulse Width Modulation), both in the stand-alone format devices and our integrated self-powered speakers and mixers
- **Higher efficiency** (up to 92%) by using **Power Factor Correction** (PFC) in many of our digital amplifiers. Few audio manufacturers integrate PFC in their products
- All the above technologies applied to Ecler's products have two immediate **environmental advantages**:
  - The amplifier's **power consumption** is significantly reduced
  - The **air conditioning power** required to keep an installation in proper working condition is also **reduced**

## ENERGY SAVING

- **Energy saving during the transportation** thanks to the **ultra-light weight** and **compact sizes** of the latest generations of amplifiers
- **Higher efficiency** (up to 92%) by using **Power Factor Correction** (PFC) in many of our digital amplifiers. Few audio manufacturers integrate PFC in their products
- Many of Ecler's products include the **Auto Standby function**, which again drastically reduces the power consumption (usually below 3 Watts), in this case during the periods the device is not utilizing full functionality

## NO CONTAMINANT COMPONENTS

- Ecler **avoids the use of contaminant components and ensures recycling** benefits are realised after the product lifetime, fulfilling **ROHS** (Restriction of Hazardous Substances) and **WEEE** (Waste Electrical and Electronic Equipment) regulations
- Ecler enforces **careful selection and disposal procedures of the electronic waste** in all our production processes to guarantee minimal environmental impact

## RECYCLED MATERIAL

- Ratio of **recycled material in packaging is 70%**. This 70% recycled carton ratio ensures that the final result fulfils our drop & transportation test standards: Although recycled carton is weaker than fibre based products, we insist: on the maximum % of recyclable material while still ensuring the packing endurance target. Apart from this ratio, our outer carton packing is always **100% recyclable** at the end of its use
- Our packaging providers have raw material suppliers that follow a **sustainability policy** to help ensure that the **total forest surface in Europe grows** every year
