Mobile Power Distribution System

Power distribution mobile and flexible

Major's Mobile Power Distribution System impresses by its ruggedness, reliability and the high grade of mobility. These cleverly designed power distributors are first choice for all kind of events i.e. exhibitions, sports events, TV- and film production.

The Mobile Power Distribution System devices are made of polyethylene and therefore extremely robust, weather- and aging-resistant. Additionally the protection of e.g. line circuit breakers and RCDs by hinged covers and the stability on uneven surfaces make these distributors very reliable. Due to the compact and lightweight design and the integrated handles they perfectly suit mobile applications. The power distributors are available in four sizes and individually assembled in Major's master workshop according to customer's specifications. Only quality components from manufacturers like Siemens, Mennekes®, Neutrik and Harting are incorporated. Front- and rear covers can be easily removed for service. Stands and creeper dollies are available as an option.

Product example

- + Professional mobile power distributors for events, exhibitions, sports events, TV- and film production
- + Custom configurations and 4 housing sizes available
- + Extremely robust, weather proof and reliable
- + Stackable easily and safely

- + Protects integrated connectors and devices
- + "Nightlife" connectors available for an entire black appearance
- + Also available as Exhibition Version and Easy

Custom configurations and 4 housing sizes available

*Available as an option:
Stands and creeper dollies*

Mobile Power Distribution Exhibition Version

Power distribution for exhibitions

Especially for exhibitions, Major has developed the Mobile Power Distribution Exhibition Version (EV) power distribution unit, that can be perfectly integrated into exhibition cabinets or mounted onto walls at exhibitions. Due to the compact and lightweight design and integrated handles, it is perfect for all mobile applications. The hooks are made for quick mounting. This device also offers an easily accessible connector panel for terminations plus protection via line circuit breakers and RCDs – which themselves also have hinged covers for extra stability when resting on uneven surfaces. The power distributors are available in two sizes and individually assembled in Major's master workshop according to customer's specifications. Only quality components from manufacturers like Siemens, Mennekes®, Neutrik and Harting are incorporated.

- + Professional mobile power distributors for events, exhibitions, sports events, TV- and film production
- + Custom configurations and 2 housing sizes available
- + Extremely robust and reliable
- + Lightweight and handy
- + "Nightlife" connectors available for an entire black appearance

Product example

Mobile Power Easy

Power distribution compact

The Mobile Power Easy is made of polyethylene and therefore extremely robust, weather- and aging-resistant. Additionally the protection of e.g. line circuit breakers and RCDs by hinged covers and the stability on uneven surfaces make this distributor very reliable. Due to the compact and light-weight design and the integrated handles it is perfectly suited mobile applications.

Product example

- + Professional mobile power distributors for events, exhibitions, sports events, TV- and film production
- + Extremely robust, weather proof and reliable
- + Stackable easily and safely
- + Lightweight and handy
- + Protects integrated devices

Major belongs to the Lightpower group of companies. Lightpower is an internationally renowned distributor for professional stage lighting and show technology equipment. The company offers a unique product synergy together with a comprehensive package of services – in the theatre and television sectors as well as for live stage and all other areas of entertainment.

All Major products like luminaires, power distributions, cables and connectors, lighting controls and dimmers, rigging and safety ropes as well as colours and effects are built in Germany and have earned themselves a great reputation for being used on multiple international projects over the years. Major products are high quality and have been adapted following direct communication with our customers to fulfil their needs. Major products solve problems and are made for daily use, offering an optimised price-to-performance ratio.
