## WIRELESS SYSTEM

With its five sets, the wireless system TG 500 is an all-rounder. Whether for performances on smaller stages, theater productions or speeches, the various sets always ensure perfect performance. While the vocal set with the dynamic TG V50 handheld transmitter is ideally suited for singing, the vocal set with the TG V56 condenser handheld transmitter offers an ideal solution for presentations. An unobtrusive positioning of the microphone in lectures makes the TG L58 lavalier microphone in the presenter set possible. The perfect

companion for theater productions is the headworn set with the TG H34 headset microphone. The instrument set with included WA-CGI instrumental cable is ideal for professional miking of guitar and bass. With the included rack mount kit, the 9.5" single receiver can be easily installed in a rack and also offers the possibility to mount two receivers in one rack unit. For all users who want to use multiple channels, a dual receiver with integrated antenna splitter is available.
